Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121.

I. Claims 1-4, 9-13, 18-22, 27-31, 36-40, and 45-66, drawn to a method for making an infrared-reflective roofing product, classified in class 427.

II. Claims 5-8, 14-17, 23-26, 32-35, and 41-44, drawn to an apparatus of an infrared-reflective roofing product, classified in class 52.

The inventions I and II are related as process of making and product made. The inventions are distinct if either of the following can be shown:

(1) that the process as claimed can be used to make other and materially different product or

(2) that the product as claimed can be made by another and materially different process.

For instant case, the apparatus claims could be made by a method different than that group I such that manufacture a roofing product from an aluminum material because the aluminum material is capable of producing a reflection.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

A telephone call was made to request an oral election on 3/22/2007, but did not result in an election being made.
